Krystsina Bahdanava

Frontend Developer

I am a graduate of the **Belarusian State University of Informatics and Radioelectronics** with a **degree in Information Technology Software**. I have **4+ years** of experience in web development, mainly in the **frontend**. Participated in all stages of the web application development cycle. I have been involved in **recruiting and training junior specialists**, **project management** and **communication with clients**. The main technology stack I use is **React**, **React Redux**, **Redux Saga**, **TypeScript**. I am able to make requests to various web APIs like **REST** and **GraphQL**. In addition, I have experience with Twig (Symfony). Wrote tests using **Jest**, **Storybook** documentation. For work I used Ubuntu, **Git** (Bitbucket, GitLab and GitHub), Jira (and other Atlassian products), WebStorm (and other JetBrains products). In working with the team, we adhered to the **Scrum** methodology. I also have experience not only in web development, so I am familiar with other technologies, for example, I can read and write SQL queries.

EXPERIENCE

Dec 2016 – Aug 2021
4 yrs 9 mos, Full-time
Gdynia, Poland
(Remote work, home office)
